### Meet sercos international at the Automation Summit 2013

User organisation offers tailor-made seminars for developers and users

sercos international (SI), supplier of the sercos® automation bus, will again be present at this years Automation Summit in Boeblingen, Germany. From 20<sup>th</sup> to 22<sup>nd</sup> March, the user organization offers full day seminars in German for developers and users thus also offering the opportunity to meet sercos staff and network with other attendees.

A user seminar “**Ethernet in machinery**”, will be held on 20<sup>th</sup> March, starting at 9.30 hrs. sercos staff and member presenters will explain why industrial Ethernet is used in automation and how the various realtime-Ethernet technologies differ.

Following this overview, sercos features and functions will be discussed, including hot topics like safety and energy efficiency. This seminar finishes at 16.30 hrs with an overview of various applications.

Participation fees for this [seminar](#) are 60€ excl. VAT.

The developer seminar „**The fast route to sercos**“ starts at 9.30 hrs on 21st March and is also applicable for product managers and technical sales staff. Application scenarios for sercos, and its functions and implementation will be discussed in detail so that participants will be able to better understand customer specifications and requests. This will also enable participants to easily implement sercos III interfaces.

Participation fees for this [seminar](#) are 50€ for members of sercos international e.V. and 100€ for non-members.

All seminar fees include conference folders, lunch and snacks during breaks. VAT is excluded.

More information can be obtained via our [eNewsletter](#) or our [website](#).

### About sercos international

sercos international is an association of users and manufacturers that is in charge of technical development, standardization, conformity inspection, certification, and marketing for the sercos automation bus. Compliance tests ensure that the implementation of sercos® is in accordance with standards and thus allows the combination and integration of devices from different manufacturers. Based in Germany, the organization presently has more than 70 member companies located around the world, and has liaison offices in North America and Asia.

### **About sercos**

The **SE**rial **R**ealtime **CO**munication **S**ystem, or sercos®, is one of the world's leading digital interfaces for communication between controls, drives, and decentralized peripheral devices. sercos has been used in machine engineering for more than 20 years and is implemented in over 3.5 million real time nodes. With its open, manufacturer-independent Ethernet-based architecture, sercos III is a universal bus for all automation solutions.
