sercos on YouTube

sercos international (SI), supplier of the sercos® automation bus, announces its own channel on YouTube thus expanding its online presence.

The [sercosinternational](#) channel offers videos on hot topics in the automation and machinery industry as well as interviews, exhibition films and introduction of member companies. Live videos show the automation bus in action as well as non-typical usages, rounding off the online presence. Videos are available in both the German and English languages including a playlist with English and language-independent films.

Those interested in receiving additional information can subscribe to the channel.

With this platform, SI offers another opportunity for customers and prospects to find more information, which can also be obtained via our [eNewsletter](#) or our [website](#).

About sercos international

sercos international is an association of users and manufacturers that is in charge of technical development, standardisation, conformity inspection, certification, and marketing for the sercos® automation bus. Compliance tests ensure that the implementation of sercos is in accordance with standards and thus allows the combination and integration of devices from different manufacturers. Based in Germany, the organisation presently has more than 70 member companies located around the world, and has liaison offices in North America and Asia.

About sercos

The **SE**rial **R**ealtime **CO**munication **S**ystem, or sercos®, is one of the world's leading digital interfaces for communication between controls, drives, and decentralized peripheral devices. sercos has been used in machine engineering for more than 20 years and is implemented in over 3.5 million real time nodes. With its open, manufacturer-independent Ethernet-based architecture, sercos III is a universal bus for all automation solutions.
